LOUISE NICKSON

Job: Director

Company: Deloitte

We help our clients to adopt, integrate and extract maximum value from technology, enabling the business of tomorrow. We help our clients to Imagine, Deliver and Run the future. We help our clients to shape their business of technology to exploit new opportunities for value and innovation. I do this for Finanical Services clients.

Very hard working!

The skills I use most in my job... Leadership

- Startegy
- Analysis

The most interesting thing I've worked on in my career so far... The shapping and strategy full a full bank integration. What made it so exciting was the impact it had; seeing our work be covered in the media, plus the challenge of understanding the full scope of the business

What inspired me into digital and tech... At the end of the dot.com boom it seemed a "safe" environment to go into with excellent job prospects!

My educational background is...BSc in Computer Science from Bristol University

What advice I'd give to girls thinking about a career in digital and tech... There is a huge amount of variety to be had - for the past 16 years I have had a blast and done much more than code (which was what I feared after completing a Computer Science degree)
